VIRTUAL SPRING CE - April 17, 2021

Jasmin Haley, RDH, MSDH, CDA

Jasmin Haley, RDH, MSDH, CDA, is the Founder and CEO of Beyond the Prophy®, Co-founder of the Inspire the Future Summit™ for Dental Hygiene Educators, and Co-founder of the MOMgienist® Community. She has over 18 years of experience as a dental hygienist, educator, and dental assistant. Out of those years, she has served 8 years in academia in a full-time, adjunct, or a consultant capacity.

When she is not directly helping to impact the lives of her students or dental professionals with her coaching she can be found on the stage doing what she loves best — speaking from the heart. She shares her personal experiences of overcoming overwhelm, burn out, fear, and self-doubt to help professionals rediscover their greatness and pursue their entrepreneurial goals.

She is an expert on HIV/AIDS, an advocate for the opioid epidemic, promoter of self-acceptance/self-love and crusader for cultural sensitivity. Jasmin is a national leader, entrepreneur, influencer, and a 2018 recipient of the Sunstar/RDH Award of Distinction.

Jasmin is a graduate from Allegany College of Maryland (AADH), University of Maryland, School of Dentistry (BSDH), and University of Bridgeport, Fones School of Dental Hygiene (MSDH). You can reach her at www.jasminhaley.com.

8:00-11:15am 3 CEs

It Takes A Village: Opioid Addiction and the Dental Professionals Role

The US Surgeon general reports that drug overdoses are the leading cause of preventable death. Diverse communities across the United States are struggling with the ramifications of drug addiction. Substance abuse and addictions are challenging and major public health concern that all medical and dental professionals should be prepared to address. This course will outline current trends of drug addiction and the life-saving efforts all professionals can participate in to address this epidemic.

Upon completion of this course, participants will:

• Recognize current trends and most commonly used drugs
• Identify programs utilized in some states to save lives
• Recall the protocol for the administration and delivery of Naloxone

12:00-3:15pm 3 CEs

The Inner Child: How Trauma Affects Susceptibility to Disease

A Kaiser Permanente study collected data from over 17,000 members demonstrating a correlation between trauma and adult risk behavior or disease. Trauma and adverse childhood experiences (ACE) affect many of the patient populations we serve daily. What should healthcare providers know prior to initiating treatment with vulnerable populations? This course provides a comprehensive overview of trauma from an interprofessional view and effective strategies that can aid in improving patient health outcomes for some of the most vulnerable populations in health. Specific subsets of the population will be discussed during this presentation.

• Recognize adverse childhood experiences and their impact on growth and development.
• Identify the connection between trauma and disease.
• Apply a trauma-informed approach when providing health-related services to a patient from a vulnerable population.
